Pernand-Vergelesses Île des Vergelesses Blanc 2021

1.12 hectares planted in 1985, 1992 and 2019 make up this cuvée of Pernand Île des Vergelesses Blanc. This magnificent 'Île des Vergelesses' climat, which means 'the best of a whole', is recognised by the INAO (Institut National des Appellations d'Origine) for both red and white wines.

Located on a mid-slope facing east, this climate is built on balanced clay-limestone soils and a subsoil composed of the same limestone found on the Corton hill.

This definitely makes it a 'super' premier cru. Vinification is carried out without the use of pumps or sulphites. The wine is matured in 10 hectolitre tuns and demi-muids for several wines for 20 to 30 months on the lees.

Vintage

VINTAGE 2021

A very complicated year, with vine growth starting too early, at the end of March, followed by frosts at the beginning of April, which had a devastating effect, particularly on our Savigny and Pernand vines; Corton, with its warmer climate, was only half spared.

For this vintage, the Domaine produced around 1/3 of a normal harvest. Harvesting took place from September 17 to 30. They were difficult, as there were few and rather small bunches, requiring considerable sorting. The happy surprise was that the wines were very elegant, with low alcohol content and good freshness, making them very attractive.
